

Strategic partnership in the field of school education,
KA2 - Cooperation for innovation and the exchange of good practices
KA227 - Partnerships for Creativity, "My biggest dream-better world"
Project code 2020-1-EL-01-KA227-SCH-094775

Welcome to the blog of the Erasmus+ project My Biggest Dream – Better World. The aim of this blog is to keep you updated on the various stages of implementation of this amazing project. But first, we want you to know what our project is about.

“My biggest dream-better world” is a strategic partnership Erasmus+ Project between schools from Greece, Turkey, Lithuania, Bulgaria, North Macedonia, Italy, Romania and Portugal. All these partners are interested in increasing the quality of the offered education and of the managerial competences via getting involved in European projects.

Through the needs analysis completed within the partnership, we have observed that the main issue that the partners encounter is the insufficient experience in integrated approaches of the curriculum, both in the case of teachers and students; the lack of open mindedness (in the case of some) for international cooperation and collaboration, given the need of adapting school activities to the reality of socio-economic issues, health problems or age-specific difficulties, cultural and diverse background.

In this context, the main goal of our project is ensuring the right to quality education for all the children in the partner schools.
